

# SARA NAZARI

Software Engineer

16096 Greenwood Rd. Monte Sereno, CA 95030  
saranazari80@outlook.com | +1 650 683 0432 | [LinkedIn](#)

## OBJECTIVE

---

Creative and detail-oriented Software Engineer with expertise in front-end development, data engineering, and healthcare IT integration. Skilled at building responsive, user-centric applications and implementing secure, large-scale data solutions for hospitals. Passionate about transforming complex technical challenges into scalable, intuitive solutions that drive measurable outcomes.

## SKILLS

---

**Programming & Data:** Java, Python (Pandas, NumPy, scikit-learn, Torch, JAX), C++, R, SQL

**Web & Mobile:** HTML, CSS, JavaScript, Responsive Design, Django, Node.js, Swift

**Healthcare IT:** Data migration, system integration, Epic workflows

**Languages:** English (Fluent), French (Fluent), Persian (Native)

## EXPERIENCE

---

### Data Integration Engineer — Remedi Health Solutions

Jan 2025 – Present

- Led integration projects for Centennial Hospital (TX) and Baylor Scott & White Medical Center, ensuring secure patient data migration.
- Collaborated with clinical and IT teams to align workflows with compliance and Epic standards.

### Software Engineer — JobVision

Oct 2021 – Jan 2023

- Built and integrated front-end apps and APIs using Python/Django and Node.js.
- Designed scalable back-end systems and developed responsive UIs improving customer engagement.

### Software Development Engineer — Ponisha

Aug 2020 – Oct 2021

- Cleansed and analyzed large datasets using Python & SQL for product insights.
- Built reporting tools with dynamic UI components and automated workflows, reducing manual work by 40%.

### Software Engineer — Yektanet

Jan 2019 – Aug 2020

- Developed machine learning models predicting customer churn, cutting attrition by 15%.
- Delivered interactive data-driven visualizations for business stakeholders.

## PROJECTS

---

### TaskPulse — Chrome Extension

- Built a Chrome extension that aggregates emails and Slack messages into a unified inbox, allowing users to create and manage tasks without leaving the browser.
- Developed using JavaScript, Chrome Extensions API, and OAuth integrations for Gmail and Slack.
- Designed an intuitive popup interface for quick task creation, prioritization, and tracking.

### Dumpster — iOS App — In Development

- Developing a social iOS app for rating and cataloging bad movies, featuring user profiles, movie ratings, and a community feed of hilariously terrible films.
- Building with Swift and SwiftUI, integrating movie database APIs for search and metadata.
- Implementing social features including user profiles, follow system, and shared “worst of” lists.

## EDUCATION

---

**B.S. Computer Science** — University of Tehran, Iran | *Jun 2023*

- GPA: 92.5% (A) | Coursework: Probability Theory, Linear Algebra, Data Structures & Algorithms, Operating Systems

**Certifications (In Progress):** IBM AI Developer, Python for Data Science, AI for Business, Google Data Analytics
